Subject Index

Pages of errata are in italics.

Acknowledgment of reviewers, v (Vol. 61, No. 1)
Air classification, of peas harvested at several stages of maturity (Tyler and Panchuk), 192
Alcohol
distillation; of wheat (Wu et al), 423
production in blended foods
compositional and nutritional studies (Wall et al), 504
sensory, stability, and processing studies (Bookwalter et al), 509
Algae, as protein supplement in bread (Finney et al), 402
Alkali, gel test for rice (Pillaiyar), 255
α-Amylase
activity in wheat (Reddy et al), 228
isoenzymes; synthesis of in wheat kernels (Marchylo et al), 305
measurement of cereal and fungal (Perten), 108
Amino acids
composition of D hordein, communication to the editor (Shewry, 555; Blake, 555)
effect on nutritive value of legumes (Davis et al), 311

Baking
bread
from pearl millet flour (Khalil and Sawaya), 301
soy-fortified with sweet cheese whey solids (Guy), 83
cake
functionality of lipids (Donelson et al), 88
heat transfer and water loss with monoglycerides (Croke et al), 363
temperature profiles and water loss after storage with monoglycerides (Croke et al), 371
volume methods for (Croke et al), 375
cookies
navy bean-sesame blends (Hooijat and Zabik), 41
from soft red wheat, soil property effect (Kirlia et al), 518
Do-Corder to study dough development (Endo et al), 112
of frozen dough, factors affecting stability (Wolt and D'Appolonia), 209, 213, 384
model cake batters containing nonfat dry milk (Pearce et al), 549
quality; relation between loaf volume and lipid binding by gliadin and glutenin (Zawistowska et al), 527
Barley
cultivar identification of by HPLC (Marchylo and Kruger), 295
purification of d-hordeins (Blake et al), 120
structure of amylpectin from normal and waxy (MacGregor and Morgan), 222
Beans, white-, equilibrium moisture content of (Hutchinson and Otten), 155
Beta-0-glucan, analysis in oats using Calcofluor (Wood and Weisz), 73
Bioavailability
of vitamins A and E (Omaye and Chow), 95
of zinc in corn foods intrinsically labeled with zinc-65 (Garcia et al), 360
Bran, durum-, fiber constituents of (Kunerth and Youngs), 350
Bread and baking
algae as protein supplement (Finney et al), 402
balady-, effect of baking time and temperature on bread quality, starch gelatinization, and staling (Faridi and Rubenthaler), 151
bran and shorts from hard red vs. hard white wheats in (Moder et al), 269
bread from germinated wheat; baking characteristics of moderately strong and overly strong wheat (Lukow and Bushuk), 336
Do-Corder to study dough development (Endo et al), 112
dried distillers grain from sorghum, use in (Morad et al), 409
effect of waxy barley starch and reheating on firmness (Ghiasi et al), 281
flour test for (Shogren and Finnby), 418
oils, surfactants, and their blends as replacements for shortening in (Bruinsma and Finnby), 279
optimized, straight-dough method (Finnby), 20
quality affected by lipids and emulsifiers (Pomeranz et al), 136
soy-fortified; effect of storage with sweet cheese whey solids (Guy), 83
volume affected by break and shred (Shogren and Finnby), 179
wheat and rye, structure of (Pomeranz et al), 53
Break and shred, effect on bread volume (Shogren and Finnby), 179
Buckwheat, effect on protein quality of germination and changes in trypsin inhibitor (Ikeda et al), 236

Cakes and cookies
cakes
functionality of lipids (Donelson et al), 88
heat transfer and water loss during baking with monoglycerides (Croke et al), 363
model batters containing nonfat dry milk (Pearce et al), 549
surface characteristics evaluated by cross-classification technique (Evans et al), 292
volume methods from cake cross-sections (Croke et al), 375
water loss after storage with monoglycerides (Croke et al), 371
cookies
corn sweetener effect on quality (Curley and Housey), 274
differential scanning calorimetry of (Abboud and Housey), 34
dough; effect of mixing time and ingredients on farinograms of (Olewnik and Kulp), 532
navy bean-sesame blends (Hooijat and Zabik), 41

Calcium
effect on lipid parameters in rats (Bock and Ranhotra), 514
ions, binding to soy protein (Kroll), 490
Carbohydrates
of durum wheat bran and whole meal; unavailability (Kunerth and Youngs), 350
modification of orcinol, anthrone, and carbazole colorimetric reactions (Kunerth and Youngs), 344
structure of amylpectin from barley starch (MacGregor and Morgan), 222
Cereal
alkylresorcinols; toxicity of (Seclet et al), 239
dietary fiber
analysis from, minerals and phytates in (Schweizer et al), 116
content and composition at different extraction rates (Nyman et al), 14
iron solubilization in (Clydesdale and Nadeau), 330
proteins; enzymic solubilization of by commercial proteases (Nkone and Ballance), 316

Chlorination
effects on cakes of lipids from untreated and chlorinated flour
(Donelson et al), 88
oil-binding capacity
of chlorinated starch (Seguchi), 244
of prime starch from chlorinated wheat flour (Seguchi), 241

Chromatography
reversed-phase HPLC analysis of extracted gliadin proteins (Bietz et al), 124
wheat varietal identification by reversed-phase HPLC of gliadins
(Bietz et al), 129

Coextrusion, corn gluten and soy flour (Neumann et al), 439
Cooking, texture of cooked rice (Pillaiyar), 255

Corn
basis for hardness (Abdelrahman and Hoseney), 232
cultivar and sample various effect on moisture meter performance (Guthiel et al), 267
dry milling of trickle sulfur dioxide-treated (Peplinski and Anderson), 289

food products intrinsically labeled with zinc-65 for zinc bioavailability
studies (Garcia et al), 360

Genetics and zeins (Wall et al), 141

Hardness determination (Pomeranz et al), 147
rheological behavior of Venezuelan arepa dough made from
precooked flour (de Padua and Padua Maroun), 37, 384
shortened flow for dry milling (Peplinski et al), 60
storage; ergosterol as index of fungal invasion (Naebwanji et al), 385
syrup; effect on cookie quality (Curley and Hoseney), 274
wet milling of ensiled kernels (Neryong and Reilly), 8
zein; isoelectric focusing in aagrose (Wilson), 198

Corn distillers' grains
in blended foods
composition and nutrition (Wall et al), 504

Sensitive, stability, and processing studies (Bookwalter et al), 509

Cornstarch, rheology and yield stress of (Christianson and Bagley), 500

Cottonseed
75 storage protein of, isolation procedure (Zarins et al), 471
storage protein characterization by SDS-PAGE (Marshall et al), 166

Dough
cookie-, effect of mixing time and ingredient variation on farinograms
of (Olewnik and Kulik), 532
Do-Corder to study dough development (Endo et al), 112
extensigraph properties of; effects of fermentation time, flour strength,
and salt level on (Casutt et al), 454

frozen-, effect
of yeast on stability (Wolt and D'Appollonia), 209
of yeast, flour, and dough additives on stability (Wolt and D'Appollonia), 213
kneading quality of sprouted sorghum (Murty et al), 415
from precooked corn flour, rheological behavior of Venezuelan arepa
(de Padua and Padua Maroun), 37
wheat and rye, structure of (Pomeranz et al), 53
wheat flour-, modification by cycloheptaamylose (Kim and Hill), 406

Drying
drum-, of wheat starch; physical and molecular modifications
(Colonna et al), 538
post-, fissions related to, in rough rice (Nguyen and Kunze), 63

Electrophoresis
of cottonseed storage proteins (Marshall et al), 166
gel-, of gliadin fractions (Huebner and Dietz), 554
for gliaden detection (Khan), 378
of gliadins from stressed wheat samples (Lookhart et al), 496

isoelctric focusing of zein (Wilson), 198

SDS-PAGE of gliadins and glutenins from germinated wheat (Lukow
and Bushuk), 340
two-dimensional-, of zeins (Wall et al), 141
use in preparative and analytical hordein fractionation (Blake et al), 120

Enzymes
cereal and fungal α-amylase measured by modified falling number
method (Perten), 108
cereal protein solubilization and degradation by commercial proteases
(Nkonge and Ballance), 316
immobilized-, bioconversion of starch to ethanol by calcium-alkalinate
(McGhee et al), 446
lipooxygenase isoenzymes of durum wheat endosperm (Hsieh and
McDonald), 392

Errata
de Padua and Padua Maroun (Vol. 61, p. 37), 384
Wolt and D'Appollonia (Vol. 61, p. 209), 384

Ethanol, bioconversion of starch to (McGhee et al), 446

Extrusion cooking
effects on dietary fiber content and on degradation in rat intestinal
tract (Björck et al), 174
of wheat starch; physical and macromolecular modifications (Colonna
et al), 538

Faba beans, cookability as related to seed coat microstructure (Youssef and
Bushuk), 381

Falling number, modified for measuring cereal and fungal α-amylase
activity (Perten), 108

Fatty acids
free-, produced during storage of pearl millet (Kaced et al), 187
of oats; effects of oil extraction procedures on composition (Karow et
al), 196

Fermentation
effect on extensigraph properties of dough (Casutt et al), 454
yeast-protein concentrate to increase (Lai et al), 428

Fiber
constituents in durum bran and whole meal (Kunerth and Youngs),
350
dietary-
analysis by enzymatic gravimetric method (Schweizer et al), 116
composition and fermentability (Björck et al), 174
content and composition in cereals at different extraction rates
(Nyman et al), 14
minerals and phytate in analysis of, from cereals (Fröhlich et al), 357
quantitation using modified orcinol, anthrone, and carbazole
colorimetric reactions (Kunerth and Youngs), 344

Fissures, relation to postdrying treatments in rough rice (Nguyen
and Kunze), 63

Flour
bean protein-, use in cake doughnuts (Spink et al), 251
bread-making test for (Shogren and Finney), 418
flourability of hard and soft wheat flours (Neel and Hoseney), 262
gel and dough quality of sprouted sorghum (Murty et al), 415
from germinated wheat
functionality and biochemical properties (Lukow and Bushuk),
336
protein composition (Lukow and Bushuk), 340
moisture determination by microwave (Davis and Lai), 1
physically weak vs. physically strong (Modler et al), 269
proteins; association of fractions with flour lipids (Zawistowska et al),
527
rheology of Venezuelan arepa dough made from precooked corn (de
Padua and Padua Maroun), 37, 384
rice, waxy; characteristics of (Bean et al), 475
sieved characteristics of hard and soft wheat flours (Neel and
Hoseney), 259
soy-, coextrusion with corn gluten (Neumann et al), 439

wheat-

bread quality of defatted (Pomeranz et al), 136
modification by cycloheptaamylose (Kim and Hill), 406

oil-binding capacity of prime starch from chlorinated (Seguchi),
241
wheat and nonwheat-, chapatis made from, soy enrichment (Lindell and
Walker), 435

Fractionation, of protein-rich material from sorghum alcohol distillation
(Wu and Ssexon), 388

Gelatinization
starch-
of baked cookies and cookie doughs (Abboud and Hoseney), 34
of balady bread, effect of baking time and temperature on (Faridi
and Rubenthaler), 151
waxy rice; characteristics of (Bean et al), 475

wheat starch
in batters with nonfat dry milk (Pearce et al), 549
physical characteristics in presence of cycloheptaamylose (Kim
and Hill), 432

Germination
amylase activity in sorghum (Murty et al), 415
of buckwheat; effect on protein quality and changes in trypsin inhibitor
(Ikeda et al), 236
effect on endosperm cell walls (Glennie), 285
lipase activity in oats (Urquhart et al), 105
production of α-amylase isoenzymes during (Marchylo et al), 305
Gliaden
detection by dye binding and TCA precipitability (Khan), 378
effect of lipids on electrophoregram (Zawistowska et al), 527
extraction conditions for reversed-phase HPLC analysis (Bietz et al), 124
separation by reversed-phase HPLC (Huebner and Dietz), 554
wheat- PAGE of, effect of environment and germination (Lookhart et al), 496
wheat varietal identification by reversed-phase HPLC (Bietz et al), 129
Gluten
corn-coextrusion with soy flour (Neumann et al), 439
proteins from wet-milled (Neumann et al), 353
gel filtration and characterization of neutral salt extracted wheat proteins (Preston), 76
production by wet milling (Neryng and Reilly), 8
viscoelastic properties of dispersion (Mita and Matsumoto), 169
Grain
dried distillers', from sorghum, use in baked foods (Morad et al), 409
tempering of; theoretical approach to (Hsu), 466
Grain sorghum, basis for hardness (Abdelrahman and Hoseney), 232
Hordein, barley storage proteins, communication to the editor (Shewry, 555; Blake, 555)
HPLC
for analysis of molecular weight changes of buffer-soluble proteins during germination (Kruger), 205
determination of saccharides (Warthesen), 194
reversed-phase of extracted gliadin proteins (Bietz et al), 124
preparative separation of gliadins by (Huebner and Bietz), 554
for separation of hordein proteins (Marchylo and Kruger), 295
wheat varietal identification by reversed-phase analysis of gliadins (Bietz et al), 129
Instructions to Authors, iii (Vol. 61, No. 1), 257 (Vol. 61, No. 3)
Instruments and instrumentation
for bread-making test of flour (Shogren and Finney), 418
determination of saccharides (Warthesen), 194
Do-Corder to study dough development (Endo et al), 112
HPLC analysis
of extracted gliadin proteins (Bietz et al), 124
of gliadin proteins (Bietz et al), 129
moisture meters; effect of corn cultivar and sample variance on performance of (Gutheil et al), 267
Iron
ingredient effect in spray-dried soy beverage (Kadan and Ziegler), 5
solubilization and availability (Clydesdale and Nadeau), 330
Legumes
air classification of peas; effect of maturity (Tyler and Panchuk), 192
air-classified flour protein in cake doughnuts (Spink et al), 251
protein nutritional quality, amino acid supplementation (Davis et al), 311
Lipase, activity in oats during grain maturation and germination (Urquhart et al), 105
Lipids
effect on flowability of hard and soft wheat flours (Neel and Hoseney), 262
effects on toast bread (Pomeranz et al), 136
extraction procedures for oats and their effect on fatty acid composition determinations (Karow et al), 196
parameters in rat; effects of pectin, phytate, and calcium (Bock and Ranhotra), 514
from untreated and chlorinated flours; effects on cakes (Donelson et al), 88
Lipoxygenase, isoenzymes from durum wheat endosperm (Hsieh and McDonald), 392
Maize, grain, leaf, and husk waxes of (Bianchi et al), 45
Methods
Calcfluor for analysis of beta-D-glucan (Wood and Weisg), 73
cross-classification technique to evaluate cake surface characteristics (Evans et al), 292
electrical; time-dependent moisture gradients in conditioned wheat (Pomeranz et al), 559
gel test to assess texture of parboiled rice (Pillaiyar), 255
gliadin extraction for analysis by reversed-phase HPLC (Bietz et al), 124
gradient SDS-PAGE in hordein peptide mapping (Blake et al), 120
identification of Canadian barley cultivars by HPLC (Marchylo and Kruger), 295
for isolation of 7S storage protein of cottonseed (Zarins et al), 471
for measuring cereal and fungal α-amylase (Perten), 108
near-infrared reflectance for estimation of protein (Lai et al), 327
optimized, straight-dough, bread-making (Finney), 20
for quantitation of monosaccharides of flour (Kunerth and Youngs), 344
rapid analysis of molecular weight of buffer-soluble proteins by HPLC (Kruger), 205
wheat varietal identification by HPLC analysis of gliadins (Bietz et al), 129
Milk, solubilization of iron in cereals by (Clydesdale and Nadeau), 330
Mill, pearl-
basins for hardness (Abdelrahman and Hoseney), 232
effect of storage conditions on lipids (Kaced et al), 187
mineral and vitamin contents, retention in bread (Khalili and Sawaya), 301
procedure to produce rotis (Olewnik et al), 28
Milling
dry-, of corn by shortened flow (Peplinski et al), 60
impact-, of peas (Tyler and Panchuk), 192
of semolina; effect of conditioning treatments on (Kathuria and Sidhu), 460
sieving characteristics of hard and soft wheat flours (Neel and Hoseney), 259
soft red wheat, grown on sludge-treated soils (Kirleis et al), 518
trickle sulfur dioxide-treated corn (Peplinski and Anderson), 289
wheat-, visual analysis of (Davis and Eustace), 182
Minerals
in analysis of dietary fiber from cereals (Schweizer et al), 116; (Frölich et al), 357
components of pearl millet flour and bread (Khalili and Sawaya), 301
 Moisture
cake batters with nonfat dry milk; rates of water loss during baking (Pearce et al), 549
equilibrium-, of white beans (Hutchinson and Otten), 155
flour-, microwave-oven for determination of (Davis and Lai), 1
meters; effect of corn cultivar and sample variance on performance of (Gutheil et al), 267
in wheat; time-dependent moisture gradients determined by electrical methods (Pomeranz et al), 559
Nutrition, mineral and vitamin contents of pearl millet flour and bread (Khalili and Sawaya), 301
Oats
analysis of beta-α-glucan using Calcfluor (Wood and Weisg), 73
lipase activity during grain maturation and germination (Urquhart et al), 105
oil extraction procedures and their effect on fatty acid composition determinations (Karow et al), 196
Packing, effect of light on nutrient stability (Furuya and Warthesen), 399
Particle size, effect on NIR (Norris and Williams), 158
Pasta, riboflavin content and stability (Furuya and Warthesen), 399
Pectin, effect on lipid parameters in rats (Bock and Ranhotra), 514
P.H., effect of, on binding of Ca²⁺, by soybean protein (Kroll), 490
Phosphate, effect on firming rate of cooked rice (Kim and Kim), 91
Phosphorus, content in soybean protein fractions as affected by processing (Honig et al), 523
Phytic acid
in analysis of dietary fiber from cereals (Frölich et al), 357
effect on lipid parameters in rats (Bock and Ranhotra), 514
Phytic acid content in soybean protein fractions as affected by processing (Honig et al), 523
recovery with soluble dietary fiber (Schweizer et al), 116
Prolamin
gliadin extraction for analysis by reversed-phase HPLC (Bietz et al), 124
localization in sorghum protein bodies (Taylor et al), 69
purification and characterization of barley D-hordein (Blake et al), 120
wheat varietal identification by HPLC analysis of gliadins (Bietz et al), 129
Protein

570 CEREAL CHEMISTRY
algae as supplement in bread (Finney et al), 402

analysis of in germinating wheat by HPLC (Kruger), 205

in barley, identification by reversed-phase HPLC (Marchyo and Kruger), 295

in buckwheat; effect of seed germination on in vitro digestibility (Ikeda et al), 236

composition of sorghum protein bodies (Taylor et al), 69

concentrate; from yeast, effects on fermentation (Lai et al), 428

contribution of glutamine side chain (Mita and Matsumoto), 169

in corn gluten, properties of (Neumann et al), 353

corn; isoelectric focusing of zein (Wilson), 198

degradative solubilization of, in cereal grists by commercial proteases (Nkonge and Ballance), 316

distribution changes in germinated wheat (Lukow and Bushuk), 340

gliadin isolation and eletrophoretic analysis (Huebner and Kroll), 554

measurement in wheat (Norris and Williams), 158

near-infrared reflectance for estimation of (Lai et al), 327

nutritional quality using Tetrahymena, effect of age of sample (Davis et al), 311

physicochemical and functional properties, 11S globulin (glycinin) (Peng et al), 480

purification and characterization of barley d-hordein (Blake et al), 120

residue from wheat alcohol distillation (Wu et al), 423

SDS characterization of cottonseed storage proteins (Marshall et al), 166

in soft and hard red winter wheats (Miller et al), 201

soybean; pH effects on calcium binding (Kroll), 490

storage-, of cottonseed, rapid procedure for isolation (Zarin et al), 471

wheat-, gel filtration and characterization of neutral salt extracted (Preston), 76

wheat gliadin extraction for analysis by reversed-phase HPLC (Bietz et al), 124

wheat varieties identified through HPLC analysis of gliadins (Bietz et al), 129

Rhology

behavior of Venezuelan arepa dough made from precooked corn flour (de Padua and Padua Maroun), 37

of cookie doughs (Olewnik and Kulp), 532

of corn and wheat starch dispersions (Christianson and Bagley), 500

Do-Corder to study dough development (Endo et al), 112

dynamic viscoelastic properties of dispersions of gluten and gluten methyl ester (Mita and Matsumoto), 169

Ribonuclease, assay for, communication to the editor (Prentice and Heisel), 204

Rice

brown-, naturally infected by Aspergillus versicolor, distribution of sterigmatocystin and fungal mycelium in kernels (Takahashi et al), 48

firming rate of cooked (Kim and Kim), 91

fissures related to post-drying treatments (Nguyen and Kunze), 63

parboiled-, gel test for texture (Pillayar), 255

storage; ergosterol as index of fungal invasion (Naebwanji et al), 385

waxy-, physicochemical and food application characteristics of (Bean et al), 475

Roti, production from pearl millet (Olewnik et al), 28

Rye

alkylresorcinols; toxicity of (Sedlet et al), 239

dough and bread structure (Pomeranz et al), 53

Scanning electron microscopy

dough, sour and bread (Pomeranz et al), 53

of sliced brown rice kernel naturally infected by Aspergillus versicolor (Takahashi et al), 48

of sorghum endosperm cell walls (Glennie), 285

of wheat milling (Davis and Eustace), 182

Semolina, conditioning treatment effect on (Kathuria and Sidhu), 460

Sorghum

alcohol distillation; fractionation and characterization of protein-rich material from (Wu and Sexson), 388

amylose activity and sprout damage in (Murty et al), 415

dried distillers grain from, use in baked foods (Morad et al), 409

dendosperm cell wall modification during germination (Glennie), 285

grain hardness; relation to measurements of grain quality (Cagampang and Kirile), 100

grain vitreousness and endosperm texture (Kirile et al), 556

protein body composition and ultrastructure (Taylor et al), 69

Soy, fortification of chapati made from wheat and nonwheat flours (Lindell and Walker), 435

Soy beverage, ingredient effect on iron distribution in spray-dried (Kadan and Ziegler), 5

Soybean

11S globulin (glycinin) (Peng et al), 480

protein calcium binding and pH (Kroll), 490

and phytic acid and phosphorus content as affected by processing (Honig et al), 523

Spaghetti, quality affected by conditioning treatments (Kathuria and Sidhu), 463

Staling

of balady bread, effect of baking time and temperature on (Faridi and Rubenthaler), 151

effect of waxy barley starch and re heating on firmness of bread crust (Ghiasi et al), 281

Starch

barley-, structure of amylopectin (MacGregor and Morgan), 222

bioconversion to ethanol (McGhee et al), 446

comparison of oil-binding ability of different chlorinated (Seguchi), 244

digestibility (Björck et al), 174

effects of gamma radiation on (MacArthur and D’Appollonia), 321

heat-treated wheat (Seguchi), 248

hydrolysates; analysis by HPLC (Warthesen), 194

oil-binding capacity of, from chlorinated wheat flour (Seguchi), 241

production by wet milling (Neryng and Reilly), 8

waxy barley-, effect on firmness of bread crust (Ghiasi et al), 281

waxy rice-, physicochemical and food application characteristics of (Bean et al), 475

wheat-extrusion cooking and drum drying of, physical and macromolecular modifications (Colonna et al), 538

physical characteristics in presence of cycloheptaamylase (Kam and Hill), 432

Sterigmatocystin, distribution in individual brown rice kernels naturally infected by Aspergillus versicolor (Takahashi et al), 48

Storage

effect of sweet whey solids in the storage stability of 12% soy-fortified bread wheat flour (Gyu), 83

ergosterol as index of fungal invasion (Naebwanji et al), 385

of pearl millet after grading (Kaced et al), 187

Sulphhydril, in corn gluten (Neumann et al), 353

Tempering, of grains; theoretical approach to (Hsu), 466

Trypsin inhibitor, of buckwheat; changes on seed germination (Ikedo et al), 236

Viscosity, of corn and wheat starch dispersions (Christianson and Bagley), 500

Vitamins

A and E; bioavailability of (Omeye and Chow), 95

components of pearl millet flour and bread (Khalil and Sawaya), 301

riboflavin in pasta, effect of light (Furuja and Warthesen), 399

Wheat

alcohol distillation; fractionation and characterization (Wu et al), 423

α-amylase activity in (Reddy et al), 228

α-amylase isoenzymes; separation by chromatofocusing and isoelectric focusing (Marchyo et al), 305

bran; bioavailability of vitamins A and E and effects on growth of rats fed diets of (Omeye and Chow), 95

composition analysis (Norris and Williams), 158

determination of molecular weight of buffer-soluble proteins during germination (Kruger), 205

dough and bread structure (Pomeranz et al), 53

durum-conditioning treatment effect on semolina (Kathuria and Sidhu), 460

conditioning treatment effect on spaghetti (Kathuria and Sidhu), 463

lipoxigenase isoenzymes from endosperm (Hsieh and McDonald), 392

determination of germination on quality (Lukow and Bushuk), 336

electrophoresis of environmentally stressed samples (Lookhart et al), 496

gamma radiation of; effects of low-dosage radiations on starch properties (MacArthur and D’Appollonia), 321

gladin extraction for analysis by reversed-phase HPLC (Bietz et al), 124

hardness of hard and soft (Miller et al), 201
soft red winter-, grown on sludge-treated soils (Kirleis et al), 518
starch; oil-binding ability of heat-treated (Sepuchi), 248
storage; ergosterol as index of fungal invasion (Naewbanij et al), 385
time-dependent moisture gradients determined by electrical methods
(Pomeranz et al), 559
varietal identification by reversed-phase HPLC analysis of gliadins
(Bietz et al), 129
Yeast
effect on frozen-dough stability (Wolt and D'Appolonia), 213
fermentation stimulant from yeast fraction (Lai et al), 428

immobilized-, bioconversion of starch to ethanol by calcium-alginate
(McGhee et al), 446
reducing compound influence on frozen-dough stability (Wolt and
D'Appolonia), 209, 384

Zein
isoelectric focusing of (Wall et al), 141
isoelectric focusing in agarose (Wilson), 198
Zinc, intrinsically labeled--; corn foods for zinc bioavailability studies
(Garcia et al), 360
